

# Conagra Brands, Inc. Animal Welfare Position Statement

---

## **Antibiotics Stewardship Standards**

Conagra Brands, Inc. ("Conagra") understands antibiotics are a necessary and important tool for human and animal health to prevent and treat infections caused by bacteria. We are committed to working with suppliers who use antibiotics responsibly to prevent the emergence of antibiotic-resistant bacteria and preserve animal health.

We encourage our suppliers to maintain a working relationship with their producers and veterinarians to make science-based decisions that improve animal health and welfare. We expect our suppliers to achieve compliance with the FDA's June of 2023 guidance, [GFI #263](#), concerning transitioning over-the-counter antibiotics to prescription-required. We rely on the responsible use and distribution of antibiotics by veterinarians and associated alliances to help our suppliers achieve compliance and ensure food safety and animal health in our supply chain.
